PROFESSIONAL SUMMARY

MBA candidate in Strategic Financial Management with hands-on experience in portfolio construction, asset allocation, investment research and client risk profiling. Built, backtested and monitored equity model portfolios using fundamental ranking frameworks, quantitative screening and technical analysis. Complements investment skills with prior capital-markets technology experience at Nasdaq spanning Equities, FX, Commodities and Derivatives, bringing a combined investment, quantitative and market-infrastructure perspective to portfolio management.

CORE COMPETENCIES

Portfolio Management • Portfolio Construction & Monitoring • Asset Allocation • Investment Research • Client Risk Profiling & Suitability • Fundamental & Relative Valuation • Technical Analysis • Quantitative Screening & Backtesting • Performance & Attribution Analysis • Multi-Asset Investing (Equity, FX, Commodities, Derivatives) • Capital Markets • Excel • Power BI • SQL

PROFESSIONAL EXPERIENCE

Aditya Birla Capital | Delhi

Jun 2026 – Present

Portfolio Management Summer Intern

- Researched a 15-stock NSE-listed NBFC universe using relative P/E valuation, PEG analysis and revenue/profit growth to identify investment candidates, and built a weighted five-factor ranking model (GNPA, NIM, ROA, CAR, ROE) to compare profitability, asset quality and capital strength.
- Translated fundamental rankings into a 10-stock model portfolio, defining stock-level allocation and rupee exposure.
- Constructed and monitored 7 equity portfolio baskets over a 5-week period, tracking holdings, capital deployed and weekly portfolio returns.
- Designed a 14-question investor risk-profiling framework covering objectives, time horizon, risk capacity/tolerance and experience to support mandate-aligned portfolio construction.
- Backtested 10 rule-based intraday strategies on 5-minute data across 15 NBFC stocks and evaluated 69 technical setups across equities, FX, commodities, G-Secs and crypto to inform directional bias as a timing overlay for portfolio decisions.

Nasdaq | Mumbai

May 2022 – Aug 2023

R&D Software Engineer – Capital Markets

- Built valuation, pricing, P&L and market-risk analytics functionality for trading and risk systems across Equities, FX, Commodities, Interest Rate Derivatives (IRD) and Credit Derivatives (CRD), developing direct product knowledge across multiple asset classes.
- Partnered with front-office stakeholders to translate trading and risk-management requirements into scalable technology solutions.

Finlatics | Remote

Aug 2025 – Oct 2025

Capital Markets Associate – Internship

- Built financial models and DCF valuations with scenario and sensitivity analysis, and developed derivatives strategies using option Greeks to evaluate risk-return trade-offs relevant to portfolio hedging decisions.

ADDITIONAL PROJECTS

J.P. Morgan Investment Banking Virtual Experience – M&A Analyst (Sep 2025): Built DCF models (WACC, FCFF, CAPM) with scenario analysis, screened M&A targets and prepared investment memos covering valuation and strategic rationale.

Quantitative Equity Analysis, Python: Built regression and volatility models (Pandas, NumPy, Scikit-learn) to benchmark large-cap technology equities against peers using statistical trend and relative valuation analysis.

EDUCATION

MBA, Strategic Financial Management (EY Collaboration) – UPES, Dehradun | CGPA: 8.57/10 | Jul 2025 – May 2027 (Expected)

CERTIFICATIONS

McKinsey Forward Program (2026) • SEBI Investor Certification (2025) • ISB – Guide to Investing (2025) • Financial Management for Managers, IIT Roorkee (2025) • Advanced Excel, LearnVern (2025)

LEADERSHIP & VOLUNTEERING

Coordinated fundraising, volunteer management and community-education initiatives across U&I, SOS Children's Villages, DAV Public School and Divyang Ek Ummeed, including teaching IT to specially-abled students (2019–2025).
